

Jib Furlers

Schaefer Furling and Reefing systems are legendary for their ability to perform under the most adverse conditions. All of our furlers use Torlon™ bearings in machined races to assure smooth operation. Trust Schaefer Furling to add a whole new dimension to your foretriangle.

Strength is just the beginning of why a Schaefer furler is the best furling system available. From years of research, we've developed a combination of features that rival any furler, at any price. That's because we've designed in, and improved, all the useful features of the world's best rated furlers and eliminated the ideas that didn't make sense.

The result is a furler that's not only strong, it's also easy to control, smooth and reliable.

Looking for the sizing on a jib furler? See our PDF here: [Jib Furler Chart 2018](#), to help determine what is right for your vessel.
