Ideal Windlass

Effective immediately, Schaefer Marine will continue sales of all Ideal Windlass products, as well as service existing models. Cliffe Raymond will continue in a consulting role with Schaefer, ensuring continuity and new product development.

Since 1936 Ideal Windlass has built the most dependable, rugged equipment available. Do you require a windlass for the most demanding conditions that will be trouble free for many years? Ideal Windlass by Schaefer has the model for you!

To read more about this new line of products to Schaefer, read our [recent press release here](#).

Seasure Marine Products

“SEA SURE” was originally the marketing organization of “H. Brown & Sons (Engineering) Ltd”, which was formed in 1956 for the manufacturing of tools, mainly for the aircraft industry.

As sailing became more popular, the need for specialized fittings became large enough to require good production facilities and “SEA SURE LIMITED” was established in September 1966 to produce and market small boat fittings.

Although most of our products are aimed at the sailing boat market, uses for them have been found in hospitals, power boats, hang gliders and even green-houses. In an ever changing

world, we have found it necessary to promote our products outside of the marine trade and to this end we are actively engaged in selling our products in the highly competitive industrial and commercial fields.

Hawk Marine Products

Hawk Marine Products, based in Hayling Island (UK), are manufacturers of numerous products offered in the U.S. through Schaefer Marine. Products include wind indicators, needlespar, slot strips, & paddleboards.
